<i>The world's most rugged guard tour system</i>	V51 Kingguard is made of corrosion-resistant stainless steel alloy.The reader is encased in a special rubber protection against shock and water
<i>Low power reminder</i>	V51 Kingguard has low power reminder. LED light flashes yellow to remind guards to charge. And software also show you low power records.
<i>Anti-vandal</i>	V51 Kingguard has impact records when someone breaks it maliciously. The manager will find out who break the reader easily.
<i>Big storage capacity</i>	V51 Kingguard has 120,000 pieces storage capacity. It has circulation storage. Data can be kept ten years with power off protection.
<i>Anti-dismantle</i>	The reader will generate a record when you open it. So if someone want to break it from inside, you will know it.
